Digital Life Lessons

Dear Candidates,

We are pleased to inform you that you have successfully passed the first round of the selection process! 🎉

Your application and skills have impressed us, and we are excited to move forward with you in the next stages. This next project will help us evaluate your creativity, problem-solving skills, and your ability to build a structured full-stack web application.

Project Overview

What is the Project?

Digital Life Lessons is a platform where users can create, store, and share meaningful life lessons, personal growth insights, and wisdom they have gathered over time. Users can organize lessons, mark favorites, track learning progress, and browse public lessons shared by others.

Why Should We Develop This Project?

People often learn valuable lessons but forget them over time. This platform helps preserve personal wisdom, encourages mindful reflection, and allows users to grow by exploring lessons from the community.

How the System Works

- Users register/login with email & password or Google (via Better Auth).

- Every user starts with a Free plan. They can upgrade to a Premium plan via Stripe payment.
- When creating a life lesson, users can choose:
 - Visibility: Public / Private
 - Access Level: Free (visible to everyone) or Premium (visible only to Premium users + the creator)
- Free users can view all public Free lessons. Premium users can view both Free and Premium public lessons.
- Premium lessons are blurred/locked for Free users with an "Upgrade to Premium" prompt.
- Users can create life lesson entries with title, description, category, emotional tone, and optional image.
- Users can browse public lessons, filter by category, emotional tone, or keywords.
- Each lesson supports reactions, comments, and saving to a personal "Favorites" list.

Ensure the Following to Get 100% Marks

⚠ Failing any of the following points will result in mark deduction.

- Include at least 20 meaningful commits on the client side & 12 meaningful commits on the server side with descriptive messages.
- Include a README file with the project name, purpose, live URL, key features, and npm packages used.
- Secure frontend configuration keys using environment variables.
- Secure your MongoDB credentials and Better Auth secret using environment variables.
- Create a design that encourages recruiters. Color contrast should please the eye and ensure proper alignment, spacing, and no "gobindo design".
- If your project is found similar to any module / conceptual / assignment project, you will receive 0 and may miss upcoming rewards.

Deployment Guideline

⚠ If your deployment is not working correctly, you will get 0.

- Ensure that your server is working perfectly on production and not throwing any CORS / 404 / 504 errors.
- Ensure your live link works perfectly and is not showing errors on landing.
- Ensure the page does not throw any error on reloading from any route.
- Logged-in users must not be redirected to Login on reloading any private route.

Layout & Page Structure

Header / Navbar

Navigation bar with the following links:

- Home
- Add Lesson (private/protected route) → redirects to /dashboard/add-lesson
- My Lessons (private/protected route) → redirects to /dashboard/my-lessons
- Public Lessons
- Pricing / Upgrade (private/protected route — visible only when user is on Free plan)
- Login / Signup (conditional — shown only if logged out)
- User Avatar Dropdown (if logged in): shows Name, Profile route, Dashboard route, Logout

Footer

Logo, Website name, Contact info, Terms & Conditions, Social Media Links (use the new X logo instead of the old Twitter bird).

💡 Keep the navbar and footer on all pages except the 404 page.

All Required Pages

Public / Auth Pages	Protected / Dashboard Pages
Home	Lesson Details (Private)
Login	Pricing / Upgrade (Private)
Register	Payment Success & Cancel

Public Lessons	Favorites (Private)
404 Not Found	Dashboard — User + Admin (Private)
	Add Lesson (Private)
	My Lessons (Private)
	Update Lesson (Private)

Authentication System

 Use Better Auth for all authentication. Secure credentials using environment variables.

Register Page

- Name
- Email
- Photo URL
- Password
- Google Login button
- Link that redirects to the Login page

Password Validation Rules:

- Must have an uppercase letter
- Must have a lowercase letter
- Length must be at least 6 characters

⚠ Show all error and success messages using toast/sweet alert. Do NOT use browser default alert().

 Do NOT implement email verification or forgot password — it inconveniences the examiner. You may add these after receiving results.

Login Page

- Email

- Password
- Google Login
- A link that redirects to the Register page

Home Page Requirements

Besides the navbar and footer, the Home Page must contain:

1. Hero Banner / Slider

Add a slider (you can use any carousel library) with at least 3 slides containing meaningful information about the platform.

2. Featured Life Lessons Section (Dynamic)

Controlled from the admin dashboard (Manage Lessons route). Admin can mark lessons as featured; those appear here.

3. Why Learning From Life Matters (Static)

4 benefit cards — static section explaining the value of preserving personal wisdom.

4. Two Extra Dynamic Sections

- Top Contributors of the Week (Dynamic) — show users with the most lessons created recently.
- Most Saved Lessons (Dynamic) — show lessons with the highest favorites/saves count.

 Must implement animation using framer-motion / motion on at least one section of the home page.

Pricing / Upgrade Page

Access Rule

- Accessible from navbar — visible to logged-in users only.

- Show only when the user is on the Free plan.
- Hidden or replaced with a "Premium ★" badge when user is already Premium.

Comparison Table

Display a clean Free vs Premium comparison table with a minimum of 6–8 rows comparing features such as:

- Number of lessons that can be created
- Premium lesson creation access
- Ad-free experience
- Priority listing in public lessons
- Access to premium content from other users
- Community badge / verified status

Stripe Payment Integration

- Button: "Upgrade to Premium" (or "Choose Premium Plan")
- Price: ₺1500 one-time payment (Lifetime access)
- On click → calls backend route /create-checkout-session → redirects to Stripe Checkout (use Stripe test mode).
- After successful payment → Stripe webhook updates the MongoDB users collection: isPremium field changes from false to true.
- If payment is canceled or fails → redirect to /payment/cancel page with a proper message.

Browse Public Life Lessons

This page displays all life lessons marked as Public by all users. Anyone (logged-in or not) can browse publicly shared wisdom.

Display Format: Card Layout

★ If lesson accessLevel is Premium and the current user is not Premium → show a blurred card with lock icon + "Premium Lesson – Upgrade to view".

Each card must include:

- Lesson Title
- Short Description Preview
- Category
- Emotional Tone

- Creator Info (name + photo)
- Access Level badge
- Created Date
- "See Details" button → opens full Life Lesson Details page

Life Lesson Details Page (Private/Protected)

★ If the lesson is Premium and the viewer is not Premium → redirect to pricing page or show upgrade banner with blurred content and a button to redirect to pricing page.

1. Lesson Information Section

- Lesson Title
- Full Description / Story / Insight
- Category (e.g., Personal Growth, Career, Relationships, Mindset, Mistakes Learned)
- Emotional Tone (e.g., Motivational, Sad, Realization, Gratitude)
- Featured Image (if uploaded)

2. Lesson Metadata

A small, clean info block showing:

- Created Date
- Last Updated Date
- Visibility (Public)
- Estimated Reading Time (optional)

3. Author / Creator Section

Show a dedicated author card with:

- Creator Name
- Creator Profile Image
- Total Lessons Created
- "View all lessons by this author" button → redirects to their profile page

4. Stats & Engagement Section

- ❤️ Like count (e.g., 1.2K Likes)
- 🍷 Favorites count (e.g., 342 favorites)

- 👁 Views count (optional — can use `Math.floor(Math.random() * 10000)` for a static random value)

5. Interaction Buttons

Place clearly below the content:

- 📌 Save to Favorites (add/remove toggle)
- ❤ Like button (toggle — add/remove `userId` from `likes[]` array, real-time update, no refresh)
- 🚩 Report Lesson button — shows confirmation popup → creates entry in `lessonsReports` collection (`lessonId`, `reporterUserId`/`reportedUserEmail`, reason dropdown, timestamp)
- Share button — share to social media (use `react-share` npm package) (optional)

Like Button Logic:

- If not logged in → show toast: "Please log in to like" or navigate to login page
- If logged in → toggle like: add/remove `userId` from `likes[]` array, increment/decrement `likesCount`, real-time UI update

6. Comment Section

- Logged-in users can post comments
- Show other users' comments below the lesson

7. Similar & Recommended Lessons (optional)

Display related 6 lessons in card format based on similar category or similar emotional tone. Filter from DB using the current lesson's category or emotional tone. Each section shows at most 6 cards.

Dashboard Layout — User + Admin (Private/Protected)

User Dashboard

1. Dashboard Home — `/dashboard`

Main overview page after login. Shows:

- Total lessons created
- Total saved (favorites)
- Recently added lessons

- Quick shortcuts to important actions
- A small analytics chart (weekly or monthly reflections/contributions)

2. Add Lesson — /dashboard/add-lesson

Form to create a new life lesson:

- Lesson Title
- Full Description / Story / Insight
- Category (Dropdown): Personal Growth, Career, Relationships, Mindset, Mistakes Learned
- Emotional Tone (Dropdown): Motivational, Sad, Realization, Gratitude
- Image (Optional)
- **Access Level (Dropdown): Free / Premium**
 - Only **Premium users** can select "Premium".
 - For **Free users**, the field remains disabled with tooltip: *"Upgrade to Premium to create paid lessons."*
 - If a Free user creates a lesson, the **access level defaults to "Free"**

✓ Form submission stores the lesson in the database and shows a success toast.

3. My Lessons — /dashboard/my-lessons

Lists all lessons created by the logged-in user in tabular format:

- Display important info in each row
- Change visibility (Public / Private)
- Change access level (Free / Premium) — premium users only
- Lesson details button
- Stats: created date, reaction count, saves/favorites count
- Update lesson button (modal or separate page)
- Delete lesson button — remove permanently with confirmation popup

Update Lesson (Private Route)

- Pre-filled form with existing lesson data
- Owner can change Access Level (Free ↔ Premium) if they have an active Premium subscription
- All fields editable except User Name & Email
- Re-upload image (optional)
- Update → saves to MongoDB → success toast

4. My Favorites — /dashboard/my-favorites

Dedicated page for lessons the user has saved, in tabular format:

- Display important info in each row
- Remove from favorites button
- Lesson details button
- Filter favorites by category / emotional tone

5. Profile — /dashboard/profile

Users can view and manage their profile:

- Display name, Email, Photo
- Number of lessons created & saved
- "Premium ★" badge if the user is Premium
- Option to update display name or photo (no email editing)
- Below profile info: Grid or list of ALL public lessons created by this user (same cards as homepage), sorted by newest first

Admin Dashboard

1. Admin Dashboard Home — /dashboard/admin

Main admin panel overview with platform-wide analytics:

- Total users
- Total public lessons
- Total reported/flagged lessons
- Most active contributors
- Today's new lessons
- Graphs: lesson growth, user growth

2. Manage Users — /dashboard/admin/manage-users

Table showing:

- User Name, Email, Role (user/admin), Total lessons created

Admin can:

- Update user role (promote to admin)
- Delete account (optional)

3. Manage Lessons — /dashboard/admin/manage-lessons

Admin can see all lessons created by all users and can:

- Delete inappropriate lessons (with confirmation popup)
- Make lessons featured (shows on home page Featured section)

- Mark content as reviewed
- Filter by category, visibility, or flags

Stats shown:

- Public lessons count
- Private lessons count
- Flagged / reported content count

4. Reported / Flagged Lessons — /dashboard/admin/reported-lessons

Tabular display of all reported lessons including:

- Lesson title
- Report count
- Button to open a modal displaying all reasons with reporter info for that lesson
- Actions: Delete Lesson / Ignore
 - **Delete Lesson:** Permanently removes the lesson from the platform.
 - **Ignore:** Keeps the lesson live and clears all reports for this lesson.

5. Admin Profile — /dashboard/admin/profile

Admin profile details and settings:

- Name, Email, Photo, Admin role badge
- Activity summary (lessons moderated, actions taken) — optional
- Admin can update profile photo and display name

Other Requirements

Loading Page

Show a loading spinner whenever data is in a loading state throughout the application.

404 Not Found Page

A custom 404 / Not Found page for invalid routes.

UI Design Requirements

 Unique Design: Research ThemeForest, uiverse.io, and design blogs. Your website must NOT be similar to any previous module, conceptual, or assignment projects.

1. Keep the main heading style (font, size, color) consistent across all sections.
2. Keep paragraph spacing balanced and text easily readable.
3. Maintain uniform image sizes and spacing.
4. Use the same button style as on the home page throughout the site.
5. Ensure good spacing and proper alignment on all pages.
6. Navbar: keep the heading/logo same style and size as on the home page.
7. Use a grid layout with equal image sizes where applicable.
8. Keep all cards equal height and width (especially in lessons, services, or product sections).
9. Use the new X logo instead of the old Twitter bird to match the latest rebrand.
10. Responsiveness: Make it fully responsive for mobile, tablet, and desktop views.

Dashboard UI Requirements

- Responsive design for mobile and tablet screens
- Consistent color theme across the entire dashboard
- Full-width dashboard layout
- Charts and graphs for quick data visualization
- User profile section with avatar and role badge

Design Resources

- <https://uiverse.io/>
- <https://devmeetsdevs.com/>
- <https://bootcamp.uxdesign.cc/free-images-and-resources-collection-for-website-c77f2fc46ce5>
- <https://themeforest.net>
- <https://codecanyon.net>

Challenge Requirements

Challenge 1 — Search + Filter + Sort on Public Lessons

- Filter by category, emotional tone
- Sort by newest, most saved

- Search by title / keyword

Challenge 2 — Token Verification

- Server verifies user token on all protected routes
- Only lesson owners and admins can edit / delete lessons

Challenge 3 — Pagination on Public Lessons

- Implement one-page pagination

Optional Requirements

 Complete optional requirements to stand out from others. Add at least 2–5 optional features.

11. Dark / Light theme toggle
12. Social sharing of lessons (Facebook, X, LinkedIn) using react-share
13. Export lessons as PDF
14. Estimated Reading Time auto-calculation based on word count
15. User activity heatmap or streak tracker on the dashboard

What to Submit

Field	Your Submission
Admin Email	
Admin Password	
Live Site Link	
GitHub Repository (Client)	
GitHub Repository (Server)	

MongoDB Collections Design idea

Suggested Collections

Collection Name	Key Fields
users	isPremium, role, name, email, photoURL
lessons	title, description, category, emotionalTone, visibility, accessLevel, likes[], likesCount, isFeatured, isReviewed, creatorId
lessonsReports	lessonId, reporterUserId, reportedUserEmail, reason, timestamp
favorites	userId, lessonId, savedAt
comments	lessonId, userId, text, createdAt
